from&#160;OurWorldInData</a> has produced <a href=„https://africaindata.org/#/title-
slide“>a&#160;well organized&#160;slide set of infographics</a> showing the progressive steps
Africa has been taking over the last several decades. Topics&#160;such as education, economic
growth and health issues are quickly explained with side-by-side charts and graphs. Where I had been
concerned about the future of Africa as a habitable content this data makes me hopeful.</p> <p><a
