454px) 100vw, 454px“/></a></p> <p>GPS art has become todays equivalent to&#160;cave
paintings. Primitive looking shapes of people and animals scrawled over our city maps show that we
can flex our self tracking muscles. There are new apps available that make drawing GPS pictures
easier. Rather than looking at google maps and trying to figure out a route to record with a fitness
app&#160;these utilities&#160;<strong>take inputs of distance and shape then map a
route</strong>.</p> <p><a href=„http://figurerunning.com/blog/how-to/“><strong>Figure
Running&#160;</strong></a></p> <blockquote><p>Everybody loves playing outside.
FigureRunning is a new sport that encourages you to get creative, go outside and discover new places
while running and getting fit. The competition is not about your running speed or distance,
it&#8217;s all about drawing.</p></blockquote> <p><strong><a
href=„https://blog.adafruit.com/2016/12/27/create-gps-art-with-these-apps/gps-art-apps-2/“
rel=„attachment wp-att-226366“><img class=„img-responsive“
